DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

National Survey District is located approximately $3\frac{1}{2}$ miles south of Frostburg in the center of the Georges Creek coal region of western Maryland. The topography of the survey district is generally flat. Maryland Route 936 runs N-S through the center of the town.

Ten Consolidation Coal Company houses within the survey district are situated on the eastern side of Route 936. These originally identical single-family dwellings are best exemplified by the Morgan House, #4 on the attached map. The 2 story 3 bay by 1 bay frame house is covered with weatherboard siding. It rests on an ashlar stone foundation and has a gabled roof with a central brick chimney. The gabled roof is extended on the northern half of the rear elevation by a shed-roofed wing. The entrance in the center of the facade, (western elevation) is sheltered by a shed roofed porch. Windows are 2/2 sash.

Privately built dwellings located within the survey district are vernacular styled buildings. These include 2 and $2\frac{1}{2}$ story 3 bay by one bay frame buildings, based on the ell plan, resting on stone foundations which have gabled roofs and hip roofed porches. An example, #2 on the attached map has a shingle covered central gable. A rectangular, $2\frac{1}{2}$ story, 2 bay by 3 bay frame building, #15 on the attached map has a gable end roof and a shed roofed porch sheltering the facade. An early 20th century frame barn is located at the northern end of the survey district.

BUILDER/ARCHITECT

STATEMENT OF SIGNIFICANCE

National is a typical company town in the Georges Creek coal region of western Maryland. Of the fourteen nearly identical buildings built by the Consolidation Coal Company circa 1908 for miners of the newly opened # 17 mine, only 10 are now standing.¹ Miners from National also worked in Consolidation's #1, 10, & 12 mines.

A common practice of companies mining the Georges Creek region was to give homes reserved for mine bosses a subtle distinction from the ordinary miner's dwellings. This is evident in the Anderson House in National, which has a half basement while the miner's dwellings have only a crawl space.²
